

# HARDI KENYA LIMITED

Suppliers of Quality Crop Sprayers

## Hardi High Pressure Cleaners

*Hardi's electrically powered High Pressure Cleaners are assembled in Kenya, and designed to survive the conditions associated with workshops and commercial cleaning applications.*

The high pressure motorpumps used are manufactured by Comet S.p.A. of Italy, whose reputation for building quality pumps for agricultural and industrial use is well known worldwide. Units are available with single-phase, three-phase options, hot and cold water, with maximum pressures up to 200bar.

The all steel frame and body is manufactured by Hardi Kenya, and is designed for maximum protection and ease of

use. A number of lance and hose options are available, as is the "Total Stop" option to conserve the pump and reduce power consumption.

As Hardi Kenya is the sole agent for Comet in East Africa, and regularly uses their pumps in our crop spraying applications, stocks of spares and maintenance

expertise are kept at a premium level. Customisation is also offered for high capacity options.

## Hardi High Pressure Cleaners

### Specifications

*Power Supply:* a. Single phase 2.2kW  
b. Three phase 3.7kW  
c. Petrol 6hp B&S petrol engine  
c. PTO-driven through gearbox

*Pump:* Comet AX Series Axial Piston  
Or Comet AXD Piston

*Pressure range:* 110 - 170 bar max

*Flow Rate:* 7 - 15 litres per minute

*Hoses:* Rubber High pressure. Lengths ranging from 8 - 15m

*Lances:* High and low pressure switching + adjustable fan nozzle.
